A ghost is a spirit of a dead person who is believed to haunt a place. It is a common belief in many cultures. In India, it is believed that the souls of the dead return to the earth and haunt the living. This is why people are afraid of ghosts. They believe that ghosts can harm them and their loved ones. They also believe that ghosts can possess people. This is why people are afraid of ghosts. They believe that ghosts can harm them and their loved ones. They also believe that ghosts can possess people.
