

ROBOTIC THEATER

Two Robots were brought on the stage along with two actors. They were given the same dialogues as the actors. They spoke the dialogues with trained expressions duly. The actors were asked to speak the same dialogue. They looked at each other brought the emotions in and when it was time to begin, one of the actors forgot the second dialogue he was about to speak. So instead of that dialogue, he spoke another one and the other actor had to continue with the new idea as the previous dialogue had been changed.

Now, the entire presentation was changed on the part of the humans.

Next day, the programmed Robots were brought in. One of them encountered a technical error and could not utter the programmed dialogue. The other Robot kept quiet as it was commanded to speak only after listening to the dialogue of the first Robot. Now, the act came to an abrupt halt. Suddenly, both the Robots bowed down to the audiences and left the stage. They were programmed to do so ONLY after the presentation got over. But, they did it beforehand and went off stage. What made them act in spite of the mechanics?

None knows but conjectures are that there's a sixth sense programmed in them which gets activated as soon as their technical glitch occurs.
